Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17, drawn to screwdriver, classified in class 81, subclass 490.
 - II. Claims 18-21, drawn to a tool bit holder (could include cutting tool bits), classified in class 408, subclass 239 R.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination as claimed does not require the particulars of the subcombination as claimed for patentability, i.e., claims 1 and 11, do not require for the holder to include a magnet... or first and second portions and indexing arrangement and (2) that the subcombination has utility by itself or in other combinations such as holding cutting bits for a cutting tool.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. It is noted that, claims 18-20 recite a tool bit storage holder for insertion into and use with a screwdriver and limitations recited for a screwdriver, these limitation while not ignored do not further limit the holder, thereby requiring the restriction, however, a holder in combination with a

screwdriver, wherein the screwdriver comprise...and the holder comprises...as recited in claims 18-21 would place these claims in class 81/490, in which case the restriction requirement would be withdrawn.
